EDUCATION

Purdue University

West Lafayette, IN

Bachelor of Science in Honors Computer Science and Data Science | GPA: 3.7

Expected Graduation: May 2028

RELEVANT COURSEWORK

- Programming in C
- Python Programming
- Discrete Math
- Multivariate Calculus
- Object-oriented programming
- Linear Algebra
- Tools in CS
- Greater Issues in CS

EXPERIENCE

Engineering Intern

Oct 2024 – Jan 2025

Greenman-Pedersen Inc.

Albany, NY

- Developed Python scripts to automate data collection, analysis, and reporting for engineering project contract bids and financial tracking, improving accuracy and efficiency in bid preparation and decision making.
- Used PowerShell to automate deployment and configuration of internal Windows-based applications across multiple workstations.
- Assisted in civil engineering project design and technical drafting to support site planning and implementation.
- Attended planning and review meetings with professional engineers to observe project development cycles
- Developed proficiency with industry standard tools such as MicroStation and Autodesk to enhance project documentation and technical communication.

PROJECTS

Bilingual Service Website | *HTML/CSS, JavaScript, Google Apps Script*

Jan 2026 – March 2026

- * Engineered a full scale website for RN Luxury Couture, a local business, to transition their booking process from Facebook to a dedicated platform.
- * Developed an automated appointment system using Google Apps Script to synchronize form submissions with Google Calendar and trigger automated email confirmations for clients.
- * Implemented a custom language toggle to support the company's primary Hispanic customer base, enabling translation between English and Spanish on website.
- * Collaborated directly with owners through meetings to refine UI/UX elements and ensure the final product met personal and business requirements.

Ticket Management System | *Java, Socket Programming, Swing, Multi-threading*

Oct 2025 – Dec 2025

- * Developed a full stack Java application for event browsing, seat selection, and transactions.
- * Engineered a synchronized Socket protocol for data exchange between client GUI and server.
- * Implemented admin features as RESTful API for dynamic pricing, section locking, and store hour management.
- * Designed a full Java Swing GUI supporting seat mapping, account funds, and core user workflows.

AirBeats Hackathon Project | *JavaScript, MediaPipe, TensorFlow.js, Tone.js*

Sept 2025 – Sept 2025

- * Developed a real time interactive music platform allowing users to create beats using hand gestures.
- * Implemented gesture recognition using MediaPipe and TensorFlow.js, mapping motions to audio outputs via Tone.js for sound generation.
- * Designed and coded the full UI, integrating live visual feedback.
- * Conducted iterative user testing during the hackathon, refining responsiveness and intuitiveness.

Unity Game Development Projects | *C#, Unity*

June 2022 – Dec 2024

- * Developed, coded, and published 5 independent games using C# in the Unity engine, implementing gameplay mechanics, UI systems, and physics simulations.
- * Managed the full development life cycle for each project, including concept design, level design, asset integration, testing, debugging, and deployment to multiple platforms.
- * Achieved 9k+ downloads across all games.

SKILLS

Languages: Java, C, Python, C#, HTML, CSS, Google Apps Script, R

Databases: Oracle, MS SQL Server

Developer Tools: Git, VS Code, IntelliJ, Eclipse, Jupyter Notebook, PyCharm

Other Skills: Microstation, Autodesk, Unity
